PROFESSIONAL SUMMARY

Motivated Full-Stack Developer and MCA student with a strong foundation in frontend & backend web development, Software Engineering, Java, Python, JavaScript, and SQL. Experienced in engineering full-stack web applications using JavaScript, Tailwind CSS, PHP, Flask, and MySQL/SQLite3, and building RESTful APIs. Passionate about designing clean, responsive user interfaces, scalable backend services, optimizing database queries, and solving complex algorithmic challenges.

TECHNICAL SKILLS

- Languages:** JavaScript (ES6+), HTML5, CSS3, Java, Python, SQL
- Frameworks & Libraries:** React.js, Flask, Tailwind CSS, Bootstrap
- Databases & Web APIs:** MySQL, SQLite3, RESTful APIs, JSON, Fetch API
- Developer Tools & Testing:** Git, GitHub, VS Code, Postman, Jupyter Notebooks, Linux CLI, Pytest
- Core CS Concepts:** Data Structures & Algorithms (DSA), Full-Stack Web Architecture, Object-Oriented Programming (OOP), DBMS, Web Security, Software Engineering

PROJECTS

NovaChat – Context-Aware AI Chatbot & Dialogue Manager

2026

Tech Stack: Python 3.x, Flask, Tailwind CSS, spaCy (v3.8), Hugging Face API, SQLite3, JavaScript

- Engineered a full-stack conversational AI web platform integrating **spaCy NLU** for real-time intent classification, sentiment scoring, and Named Entity Recognition (NER).
- Implemented a **finite-state dialogue manager** with sliding-window memory and turn summarization to maintain multi-turn context while reducing token bloat.
- Integrated **Hugging Face LLM APIs** (`Qwen2.5-7B`, `Zephyr-7B`) with graceful fallback heuristics for offline resilience and low-latency responses.
- Built a **RESTful Flask backend** with SQLite3 persistence, secure session authentication, dynamic frontend UI rendering, and multi-format history exports (JSON, DOCX, PDF).

Pizza Palace – Online Food Order & Management System

2025

Tech Stack: PHP, MySQL, JavaScript (ES6), HTML5, CSS3, Tailwind CSS, XAMPP

- Engineered a **full-stack web application** automating customer registration, menu browsing, cart management, and real-time order tracking.
- Designed and normalized a **MySQL database schema** to manage relational tables for users, orders, menu inventory, and admin actions.
- Built a **responsive full-stack administrative dashboard** providing real-time order status management, customer records, and automated sales reports.
- Applied **input sanitization and prepared SQL statements** to safeguard full-stack web endpoints against SQL injection and Cross-Site Scripting (XSS) vulnerabilities.

EDUCATION

Master of Computer Applications (MCA)

2024 – 2026

Davangere University Shivagangothri – Davangere, Karnataka

Relevant Coursework: Data Structures & Algorithms, DBMS, Web Technologies, Software Engineering, Python Programming

Bachelor of Science (BSc)

2021 – 2024

GFGC and PG Center – Chintamani, Karnataka

Academic Score: 8.2 CGPA | Coursework: Computer Science, Web Development, DBMS, Mathematics

CERTIFICATIONS & ACHIEVEMENTS

- Full-Stack Web Development:** Hands-on experience building end-to-end, relational database-backed full-stack web applications.
- Problem Solving & DSA:** Active learner practicing Data Structures and Algorithms on LeetCode (leetcode.com/u/JayanthDev).

INTERESTS & ACTIVITIES

Logical Puzzles & Competitive Coding • Exploring Generative AI & Automation • Playing Chess • Bike Riding
